In a family having three children , there may be no girl, one girl, two girls , or three girls. So the probability of each is 1/4. Is this correct ? Justify your answer.

**Solution:**

NO, it is not correct.

Let,

$$X = \{0, 1\} \tag{1}$$

$$p_X(k), k = \{0, 1, 2, 3\} \tag{2}$$

$$p_X(0) = C(3,0)\left(\frac{1}{2}\right)^0 \left(\frac{1}{2}\right)^3 \tag{3}$$

$$p_X(0) = C(3,1)\left(\frac{1}{2}\right)^1 \left(\frac{1}{2}\right)^2 \tag{4}$$

$$p_X(0) = C(3,2)\left(\frac{1}{2}\right)^2 \left(\frac{1}{2}\right)^1 \tag{5}$$

$$p_X(0) = C(3,3)\left(\frac{1}{2}\right)^3 \left(\frac{1}{2}\right)^0 \tag{6}$$

$$\implies p_X(0) = \frac{1}{8} \tag{7}$$

$$\implies p_X(1) = \frac{3}{8} \tag{8}$$

$$\implies p_X(2) = \frac{3}{8} \tag{9}$$

$$\implies p_X(3) = \frac{1}{8} \tag{10}$$

| Parameter | Value | Description |
|-----------|-------|-------------|
| X=0 | $\frac{1}{8}$ | no girl |
| X=1 | $\frac{3}{8}$ | 1 girl |
| X=2 | $\frac{3}{8}$ | 2 girls |
| X=3 | $\frac{1}{8}$ | 3 girls |
